Wyndham Grand Hotel Istanbul Levent, TURKEY

SYMPOSIUM HIGHLIGHTS

International Neurology and Rehabilitation Meeting

INeReM 2015

4th - 6th, June 2015 - Istanbul, TURKEY

CHAIRMAN FOREWORD

Dear colleagues and friends,

On behalf of the Executive Committee, we are honored to have INEREM 2015 "International Neurology and Rehabilitation Meeting (INEREM)" completed with great success and high rate of participation which was held on 4, 5, 6 of June 2015, in Istanbul, TURKEY.

Coming from different specialties such as Neurology, Rehabilitation medicine, and from different cultures and different health systems we all have the same objective: to improve the quality of life of our neurological patients. INEREM 2015, has brought these disciplines together and enabled the exchanging of experiences and presented a platform to update knowledge with a view to improve our clinical practice and consequently the treatment of our patients.

We have also set aside more time for clinical practice topics and also reserved a time for presentations about innovation and the future.

The Scientific Program of INEREM 2015 consisted of 14 Panels, 15 Workshops, 70 Presentations, 57 Invited Speakers. 154 abstracts were submitted and accepted as 131 Poster Presentations, 22 Oral Presentations, 2 Video Presentations.

15 Companies supported our meeting with 32 booths.

INEREM 2015 has hosted 600 participants from Turkey, Middle East, and Europe.

We have chosen a symbolic place where both Europe and Asia meet because we would like to facilitate meetings of different people involved in the care of neurological patients.

Istanbul has always been throughout history, and is still today, a meeting place of different cultures and religions. You will also be able to discover the long and rich history of this magnificent city.

The organizers will always be available to help you before, during and after the meeting and to demonstrate Turkish hospitality.

On behalf of the organizing committee

Serdar Koçer
Chairman
Hôpital du Jura, SWITZERLAND

WORKSHOPS

WORKSHOPS	PARTICIPANTS
CEREBRAL PALSY, Complex Case Management in Child Spasticity, Spasticity Management in CP combined treatment and serial casting	70
Cervical Dystonia	40
Clinical and Instrumental Assessment of Balance and Rehabilitation	65
Dynamic EMG	40
Functional anatomy of lower limb muscles and ultrasound guided injections	124
Functional Electrical Stimulation	46
Gait Analysis	100
Innovative technologies in gait rehabilitation	54
Posture and cervical dystonia rehabilitation	27
Robotic Assistance in Gait	35
Robotic Assistance in Upper Limb Rehabilitation	28
The use of end-effector devices in neurological rehabilitation to regain the ability to walk	35
Ultrasound guided BT injection techniques and lower limb spasticity and dystonia	100
Video Based Gait Analysis	44
